

The benefits of Uniteam 5, the single solution for your whole logistics flow

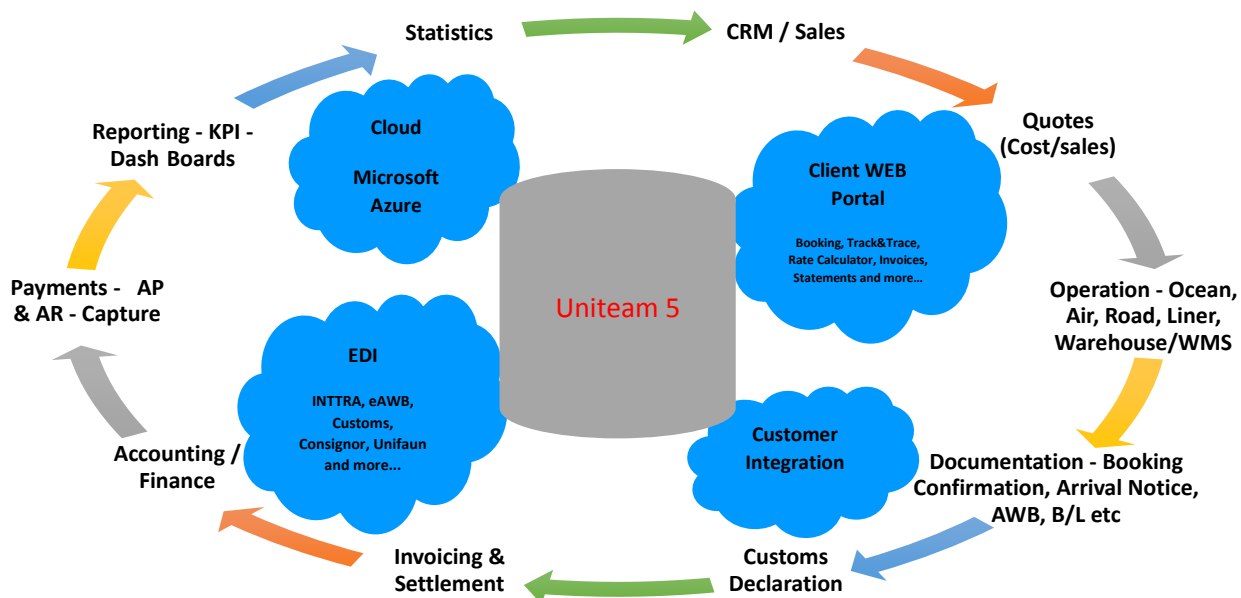

We at Uniteam are very excited about our ERP platform fully integrating Air, Ocean, Road, WMS, Finance, Accounting, Liner agency, CRM, Order management and much more...

Our web based solution which is scalable worldwide and cloud ready gives you freedom to operate and expand in a very flexible way and at the same time optimizes all processes in your organization.

With Uniteam 5 you don't need to interface to external accounting/finance systems and you can manage all your offices, companies and various countries all within the same system!

The integrated solution and streamlining of operations means huge cost savings and a much higher productivity with direct impact on your bottom line.

Uniteam 5 is based on 30 years' experience in developing TMS platforms and we guarantee high software quality, fast and responsive support, flexibility, continual improvement and fast return on investment.

At Uniteam we believe in a simple price structure, our customers need to know exactly how much they pay and for what. Our model is very simple and gives you exact information about the price you pay and what you get.
