

“UniTeam 5 – Forwarding and logistics in a box ... thinking outside the box”

UniTeam 5 is the latest generation of UniTeam’s Transportation Management System, Warehouse Management System and Finance ERP suite, offering existing and coming clients a fully integrated set of modules for transportation and warehouse management.

- **Smart archiving** - Instant digital archiving of both internal and external documents and files (Drag&Drop) into any job in any module. Facilitating true paperless operation....!
- **Customization** - Personal or role based skinning and configuration of screens, fields and menus. User defined rules for mandatory or optional data in any registration.
- **EDI** – easy integration for data in- and outbound. Several EDI-packages for authorities, networks, banks, carriers, airlines and tailor-made EDI if required by you, your clients or other parties.
- **Visibility** - Track&Trace, dash boards, document sharing, web booking and more. Selected internal milestones filtered into intelligent client information on your web portal for your clients.
- **Dynamic profit analysis** on booking activity level. Your profit is instantly indicated and specified by type on each booking as sales and costs are added.
- **More Automatization!** Fully automated matching of captured/scanned vendor invoices and booking estimates. Auto-estimate your costs per booking and have your vendor invoices controlled, matched and posted automatically. Just care about vendor invoices that differ from your estimates – no need to use time to control items which are okay.
- **Easy data reporting** – statistics, KPI, Business Intelligence. Direct database connectivity from Uniteam 5 into e.g. Microsoft Excel vis Microsoft SQL-server

... inspired to learn more? Inspired to move your transportation administration further? Inspired to inspire us and others? Inspired to optimize your processes?
